DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over PCT

Application WO 00/30338 (WO 00/30338) in view of Manico et al. (U. S. 6,373,551).

WO 00/30338, which appears to be published on May 25, 2000, teaches to an electronic film system and method of film processing, comprising:

As per claims 1-2, 7-8, 11-12, and 19,

- inputting data stored in a user device (page 48, lines 20-21);
- storing said data in a server computer connected to said network in association with a uniquely assigned address (page 32, line 8 through page 35, line 22);
- transmitting said data to a terminal connected to said network when the user accesses said server computer from the terminal using said address (page 32, line 8 through page 35, line 22).

WO 00/30338 does not specifically teach to “returning” of the user device.

Manico et al. teach to a system and method for communication of digital images generated from photographic film, wherein a one-time use camera is employed.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify WO 00/30338 to incorporate the “returning” feature because it

Art Unit: 3629

would enhance the performance of the system by allowing the customers, who do not have access to web connection, to maintain and retrieve their digital images via Internet.

As per claim 2, Manico et al. teach to said system and method, wherein said address is previously provided in said device in a form which is visible to the user (column 3, lines 13-16, 44-46).

As per claims 3, 13 and 20, WO 00/30338 teaches to said system and method, wherein said address is generated from information inherent in said device (page 33, lines 28-30; page 51, lines 21-28).

As per claims 4, 15 and 22, WO 00/30338 teaches to said system and method, wherein said address is previously stored in a memory of said device, and, when said data is input, said address stored in the memory is also input and stored into said server computer (page 32, line 8 through page 35, line 22).

As per claims 5, 14 and 21, WO 00/30338 teaches to said system and method, wherein said address is generated from information associated with the user (page 32, line 8 through page 35, line 22).

As per claims 6, 16 and 23, Manico et al. teach to said system and method, wherein said address is URL (column 3, lines 13-15, 56-59; column 5, lines 43-45, 65-67).

As per claims 9, 17 and 24, WO 00/30338 teaches to said system and method, wherein said data includes image data and/or voice data (page 44, lines 21-23; page 45, line 30 through page 46, line 6).

As per claims 10, 18 and 25, WO 00/30338 teaches to said system and method, wherein said device is a digital camera (page 2, line 16).
